Outstanding Recommendations and Outstanding Areas of Interest October 25, 2020

Current outstanding Recommendations pertaining to this program (use specific wording)	Date CNME Board voted to adopt recommendation	Date by which recommendation must be satisfactorily addressed or further board action must be taken (2-year rule)	Miscellaneous Notes (board actions in regard to this recommendation and other information)
Recommendation VI-1: The team is concerned that some clinical interns are placed directly into the primary role without any—or sufficient—experience in the early stages of the secondary role. The program needs to reassess this practice to ensure consistency with the principle of gradually ascending student intern responsibility. (Std.VI.A.7; Std.VI.C.3)	May 19, 2019	May 19, 2021	<i>Accreditation re-affirmed in May 2019 for seven years. The next full-scale accreditation visit is scheduled for fall of 2025, with a decision on continued accreditation to be made in the spring of 2026.</i>
Current outstanding Areas of Interest pertaining to this program (use specific wording)	Date CNME Board voted to adopt area of interest	Date by which area of interest must be satisfactorily addressed or further board action must be taken (2-year rule)	Miscellaneous Notes (board actions in regard to this area of interest and other information)
Area of Interest VI-1: While the program has a chart audit policy and the AZ Dept. of Health performs annual chart audits, the team found some variation in chart completeness. The program should review the chart audit process for consistent application to ensure any deficiencies are addressed. (Std.VI.D.7)	May 19, 2019	May 19, 2021	
Area of Interest II-1: The annual administrative staff performance review process was suspended for a number of years; however, a new performance process recently has been piloted. The College must ensure that regular periodic administrative staff performance reviews are implemented. (Std.II.B.5)	May 19, 2019	May 19, 2021

Outstanding Recommendations and Outstanding Areas of Interest
October 25, 2020

Residency Recommendation I-Residency Program: In light of the significant growth of the residency program, the program should make sure that residents consistently receive formative feedback from their shift supervisor and the Residency Director. (Residency Handbook, Section 3.10)	May 19, 2019	May 19, 2021	
Residency Recommendation II-Residency Program: The team is concerned that in some circumstances first-year, first quarter residents are being relied upon to participate in supervising clinic shifts without sufficient experience and oversight, as well as manageable faculty-to-student ratios. The program needs to address this issue. (Residency Handbook, Section 3.13b; Std.IVA.3; Std.VI.C.5e)	May 19, 2019	May 19, 2021
